

P412

P412 -Chronic kidney disease mineral and bone disorder

Dr Indranil Dasgupta¹, Professor Alistair Hutchison²

¹Birmingham, , , ²Dorset County Hospital, ,

Our aims:

- providing a discussion forum for researchers investigating any aspect of CKD mineral and bone disorder (CKD-MBD)
- encouraging and facilitating the development of protocols for studies in people with CKD-MBD
- promoting collaborative working between renal units to deliver studies on CKD-MBD
- advocating for funding of studies in CKD-MBD via NIHR
- facilitating discussion with industry partners to develop and deliver cost-effective studies of interventions to improve outcomes in CKD-MBD.

Who we are:

A multi-professional group with an interest in the biochemical, skeletal and blood vessel abnormalities that occur in people with advanced CKD or on dialysis.
